PROFILE SUMMARY

Final-year Data Science student at Institut Teknologi Sepuluh Nopember (ITS) with a strong interest in Data Analytics, Business Intelligence, and data-driven decision making. Experienced in transforming complex datasets into actionable insights through data visualization, statistical analysis, and dashboard development. Proficient in Python, SQL, Power BI, and Excel, with hands-on experience delivering analytical solutions across academic, professional, and organizational projects.

EDUCATION

Bachelor of Data Science | [Institut Teknologi Sepuluh Nopember \(ITS\)](#) *Aug 2023 – Jul 2027 (Expected)*

- **GPA: 3.63/4.00** | 3rd Most Outstanding Student (Mahasiswa Berprestasi) ITS 2026; Awardee of Beasiswa Indonesia Maju (BIM) DN Scholarship Batch 2 – Ministry of Higher Education, Science, and Technology (Kemdiktisaintek RI).
- **Relevant coursework:** Big Data Analysis, Database Management, Text Mining, Image and Voice Processing, Multivariate Data Analysis, Metaheuristic Optimization, Simulation Design and Analysis, Business Analytics, Digital Business.

WORK EXPERIENCE

Data Analyst Intern | [Otoritas Jasa Keuangan \(OJK\) – East Java Province](#) *Feb 2026 – Mar 2026*

- Developed SPLOG, a web-based logistics management system covering 315+ items, centralizing stock monitoring and eliminating manual recording errors across operational units.
- Implemented automated reporting pipelines that improved data accuracy and reduced report preparation time by an estimated 60% for operational staff.

Data Scientist Intern | [id/x partners × Rakamin Academy](#) *Aug 2025 – Sep 2025*

- Executed an end-to-end machine learning modeling project as capstone, delivering a client-tailored predictive solution with measurable accuracy benchmarks using Python and Scikit-learn.
- Collaborated with cross-functional team of Business Analysts, Data Engineers, and Project Managers to build and deploy data-driven IT solutions within sprint timelines.

CEO Analyst | [Produktifkuy](#) *Jan 2025 – Jul 2025*

- Selected as 1 of 53 from 1,500+ nationwide applicants; led analysis across 6 internal divisions resulting in 6 key operational improvements implemented organization-wide.
- Developed 20+ strategic proposals and data-driven slide decks directly supporting executive decision-making and cross-divisional performance planning.

PROJECTS

[ParkVision AI – Real-Time Parking Slot Detection System](#)

- Built a real-time parking detection web app using YOLOv8 object detection and computer vision, enabling automated occupancy monitoring with high accuracy.
- Designed full-stack pipeline from model inference to interactive dashboard visualization, deployed on Vercel for public accessibility.

[IndoStockAI – Realtime Stock Analytics & Forecasting System](#)

- Developed an AI-powered stock analytics platform integrating real-time market data with machine learning forecasting models for Indonesian capital market analysis.
- Combined statistical analysis, and ML modeling to deliver actionable stock trend insights and predictive signals.

[Order Management Dashboard – Looker Studio](#)

- Built an interactive dashboard analyzing 9,994 orders from 793 customers across 49 states, revealing that the Consumer Segment drives 51.9% of orders and Technology contributes 60.3%.
- Identified order growth from 7.6K (2014) to 12.5K (2017) and delivered actionable retention and inventory recommendations for strategic business planning.

[Clustering-Based Customer Insights – K-Means Segmentation](#)

- Applied K-Means Clustering (K=4, validated by Elbow & Silhouette methods) to e-commerce data, identifying distinct customer personas including High-Potential Newcomers and At-Risk Lapsed Customers.
- Delivered cluster-driven business strategies (loyalty programs, recovery campaigns) using radar charts and statistical summaries to support data-driven marketing decisions.

Data Warehouse & BI Dashboard – FRS Monitoring System

- Designed end-to-end data warehouse for ITS course registration (FRS) system using MySQL (OLTP/OLAP), Pentaho Kettle (ETL), and Power BI for interactive dashboard visualization.
- Delivered insights on GPA trends, SKS distribution, and class capacity to support academic stakeholder decision-making.

TSP Optimizer Application – Metaheuristic Optimization

- Developed a TSP Optimizer app for PCB drilling optimization, implementing 5 constructive heuristics and 2-Opt local search, achieving up to 15% distance reduction vs. greedy solutions.
- Built interactive route visualization with comparative heuristic analysis, demonstrating real-world applicability of metaheuristic methods in manufacturing systems.

Service System Simulation & Optimization – Galaxy Mall Food Court

- Collected primary observational data from 4-day field study and applied Response Surface Methodology (RSM) with Central Composite Design (13 combinations) to optimize server configuration.
- Identified optimal model (1 cashier, 5 table servers) reducing all server utility below 50%, indicating a balanced and efficient service system.

ORGANIZATIONAL EXPERIENCE

Vice Project Officer | *FSAD FAIR 2025*

May 2025 – Jul 2025

- Coordinated and supervised a cross-functional team of 70+ committee members to ensure effective project execution and timeline adherence.
- Led outreach initiatives engaging 160+ senior high school students across Indonesia, expanding national participation and program visibility.

Project Leader – FutureTalk × MiniCase | *Future Energy Summit (Futurest)*

Dec 2024 – Jun 2025

- Spearheaded a student innovation competition in the energy sector drawing 130+ participating, managing all strategic and operational aspects from planning to execution.
- Organized a high-impact platform fostering sustainable energy solutions and creative problem-solving among student innovators nationwide.

Academic Officer (AO) | *Institute of Electrical and Electronics Engineers (IEEE) ITS SB*

Mar 2024 – Jan 2025

- Maintain regular publications such as IEEE Highlights and IEEE Digest that provide up-to-date information and in-depth insights into industry developments.
- Design and organize training programs such as IEEE Scientific Writing Training that help members and student improve their scientific writing skills.

SKILLS

Data & Analytics	EDA, Statistical Analysis, Machine Learning, Big Data, Data Warehousing
Tools	Git/GitHub, Streamlit, MySQL, Pentaho Kettle, Power BI, Looker Studio, Tableau
Soft Skills	Analytical Thinking, Problem Solving, Data Storytelling, Communication, Cross-functional Collaboration

LANGUAGES

Indonesian	Native Proficiency
English	Professional Working Proficiency (C1 Advanced , EF SET English Certificate)

AWARDS & ACHIEVEMENTS

[International] 1st Place – International Business Strategy Competition (IBSC), Universitas Negeri Jakarta (UNJ)	2026
[International] 1st Place – Dokter Data Infographic Competition (DIC), Dokter Data Statistics Competition 2026	2026
[International] 1st Runner Up – International Youthpreneur Competition (IYC), SBM ITB	2024
[International] Silver Medal – Guangdong Hong Kong Macao Greater Bay Area International Mathematical Olympiad	2023
[International] Bronze Medal – Thailand International Mathematical Olympiad (TIMO) Final Round	2023
[International] Merit Award – Hong Kong International Mathematical Olympiad (HKIMO) Final Round	2023
[National] Gold Medal – Statistika Ria dan Festival Sains Data (SATRIA DATA) 2025, SIC Statistics, Kemendiktisaintek RI	2025
[National] 1st Place – Brawijaya National Youth Competition (BNYC), FIA Universitas Brawijaya (UB)	2025
[National] 1st Place – Data Competition, ISFEST Universitas Multimedia Nusantara (UMN)	2025
[National] 1st Place – Infographic Competition, 4C National FILKOM Universitas Brawijaya (UB)	2024
